## Accessibility Enhancement Committee Presentation

# Our One Big Issue

**The lack of accessibility into and within the St. Mark building** by persons with short-term, long-term or permanent physical challenges.

Those challenge may be related to age, accident, injury, illness or station in life.

**The ultimate goal of this committee is to make our building  
100% accessible to any and all persons.**

**Such as... our Vets, Post-Op Soccer Moms, Folks with Birth Defects, Sports Injuries, or our favorite “High Mileage” persons.**

# What needs to be done?

- **Create a Limited Mobility Entrance to our building for persons who cannot use or have difficulty using stairs.**
- **Create a way for those persons to move independently throughout our building.**

**SOLUTION:** Install a **VPL.**

## Vertical Platform Lift

A device similar to a small individual elevator which will allow a person and their mobility device to enter our building and then independently have access to the Sanctuary and the Fellowship Hall.
